## Almost 1000 Entries At The Didsbury Fair

The Didsbury Fair and Exhibition upheld its reputation on Tuesday and Wednesday when entries exhibited came within 75 of the record. There were almost one-thousand entries made in the various classes.

This year's fair was staged as a two-day event and judging began at 1:30 p.m. on Tuesday and the wisdom of this move was shown by fact that during the afternoon, the judges were only able to get through half the livestock exhibits.

The entry of horses was not quite up to last year's record but the quality was up to the standard. The entries in cattle broke all records, there being 102 head on exhibition and the judges complimented the management on both the quality and quantity of the exhibits. There were 100 entries in the poultry classes and the swine and sheep entries, though not large, received favorable comment from the judges.

The exhibition building was taxed to its capacity to accommodate the large number of exhibits. The vegetable section caused a good deal of favorable comment and considering the earliness of the season, the exhibits were especially good. The home-products section was worthy of special note, there being a larger exhibit than usual and the fancy-work and art section which occupied a considerable portion in the building, attracted much attention.

The exhibits were mainly local although there were a number of entries from the Carstairs and Olds districts.

On Wednesday, the second day of the fair a large number of people passed through the gate. Judging was completed early in the afternoon. In the horse section J. Fulkerth and Russell Fulkerth had an exhibit of horses, the equal of which are seldom seen at the smaller fairs, were the outstanding winners. S. L. Bosomworth of Carstairs also took first in the agricultural classes.

In the Beef Cattle, H. W. Waite, R. Sheriff, Hughes Brothers, L. S. Fisher, Olds and A. Reddon, Olds, were the principal winners.

The Dairy cattle were strongly represented and N. S. Clark, H. Brennan, E. W. Leeson, S. L. Bosomworth, Carstairs and J. Kilpatrick, Olds took most of the prizes.

The athletic events and children's sports drew lots of entries and were closely contested. In the baseball tournament, Community took the prize from Rosebud by 6-4, after playing an extra inning.

The Softball tournament was not completed and Westcott and Elkton

## Red Cross Society Helps Mosley Family.

The efforts of the Red Cross Society were very successful in their appeal for donations of clothing and comforts for the family of the late Reuben Mosley who was killed by lightning last Wednesday, when Mrs. Mosley and her five children were left destitute.

On receiving reports from the local association, the Sunshine Society of Calgary sent up a large supply of groceries and Mr. Austin, the local secretary says that clothing provided for the whole family was very quickly donated and that a large number of other comforts were also sent in.

A subscription list has been opened to provide the family with household goods and furniture. Donations will be gladly received by Mr. A. Brusso, Mr. W. A. Austin and Mr. H. Roberts.

## Highway through Town Will be Oiled

The secretary of the town received word this week from the Department of Public Works that the highway through the town will receive a coat of oil about the middle of August.

Merchants on the main street and residents along the highway will welcome this news.

Rev. A. E. Hayes and family returned Saturday from visiting Mrs. Hayes mother at Winnipeg. The trip was made by auto over the all Canadian route. Much work was being done on the highway, and within less than a year a fine class gravel road should be in use across the prairies.

Mr. Hayes said that crops between here and Calgary, also west of Didsbury looked as good as any seen except in parts of Manitoba. The prairies are badly in need of rain. Manitoba had a spell of real hot weather during July.

Mr. Hayes is taking for his subject Sunday at Didsbury, "August 3rd 'Gods Evening Edition'". The Minister will also occupy the pulpit at Olds United Church in the morning and at Westerdale at 3 P. M.

reached the final which will be played later.

An exhibition jump was given by W. J. Fulkerth's pony, "Peggy," which wound up a splendid program of sports.

In the evening, the Didsbury baseball team played an exhibition game with Calgary Oldsmobile Highflyers and took them into camp to the tune of 9-5.

## LOCAL & GENERAL

A meeting of all those desirous of forming a football team, will be held in C. E. Reiber's office next Wednesday at 8 p.m.

Mr. J. Clarke has been appointed convenor for District No. 7 in the Country Districts Golf Association tournament.

Mr. and Mrs. Folkman and sons and Mr. L. Liske of Wetaskiwin visited with Mr. and Mrs. Allan Hunsperger on Monday evening.

Mr. J. Clarke, manager of the Bank of Montreal, and family, who have been on their vacation, returned home on Monday.

Mr. and Mrs. W. Wordie of Calgary visited over the week end with their son Mr. J. W. Wordie. On Sunday both families motored to Sylvan Lake.

The monthly service in Westcott Baptist Church is postponed to the second Sunday in August, the 10th, at 8 p.m., when Rev. J. H. Curtis of Olds will be in charge.

Mrs. C. J. Cipperley who was operated on in the Didsbury Hospital three weeks ago and had returned home, suffered a relapse and was brought back to the hospital on Sunday.

Mrs. Rood formerly of Didsbury and well known in this district is here from Honolulu on her holidays. Her son, Dewey, of Lethbridge is also renewing acquaintances here. Carstairs News.

The Olds Fair will be held on Wednesday, August 6th. Besides the exhibits of livestock, agricultural products and domestic work, there will be, Baseball, football, horseshoe tournaments and Midway attractions.

Bill McFarquhar has opened his hardware store at the north end of town. He is receiving new stock every day and expects to have the store fully stocked during next week. The store will be known as "Mac's Hardware."

Messrs. Eddie Ford, Tommy Johnson, Roland Hawkes and Ed. Shand got home on Sunday from a motor tour to the coast. They report having had a great time. Tommy Johnson was lucky enough to land a big salmon out of Puget Sound and Roland Hawkes proved himself an expert camp cook.

Mr. and Mrs. Chas. Deadrick and son Eldon and Mr. and Mrs. Arden Deadrick and family motored to Shelby, Montana to meet Mr. Deadrick's sister, Mrs. C. Howe of Ralston, Iowa. The return trip was made via Crows Nest Pass, Radium Hot Springs and Banff. Each one enjoyed the trip very much but all were glad to get home. Mrs. Howe intends to stay for two weeks with her brother.

Mrs. W. Derby, of Medicine Hat is visiting friends in town this week.

Piano tuning de-luxe.—Gavin Spence and W. H. Norton are in the district. Phone orders to the Pioneer Office.

Mrs. Willard T. Nelson, of Sunnyslope left on Tuesday for Hamilton Ontario where she will visit relatives and friends.

A Barn dance will be held on Wednesday even, August 6th at W. J. Scheidt's 2 miles east of Didsbury. Bellamy's orchestra will provide the music.

Mrs. James Hughes snr. of Westcott, left on Thursday for a visit to her old home in Hanover, Ontario. At Swift Current she will be joined by her daughter, Miss Mary Hughes.

Demonstration in permanent waving will be given here Monday, August 4th at the Leuszler Block, Room 5, by Miss Tina Nohr of Calgary, at 1-30 P. M. all welcome.

George Phillipson of C.N.R., Prince Rupert, spent a few days this week with his brother, Jim Phillipson. George is delegate from Prince Rupert Lodge Elks to the Supreme Lodge at Calgary this week.

Rev. and Mrs. S. M. Eidsath, Norman and Harold were week-end guests at the home of Mr. and Mrs. Reist. Rev. Eidsath preached very acceptably in the M.B.C. Church on Sunday afternoon. The family left on Monday morning for Camrose where they have a number of relatives.

The Didsbury East local U. F. A. held a well attended meeting on Monday to consider ways and means of assisting the family of the late R. E. Mosley, who was one of their members. After passing a vote of sympathy to Mrs. Mosley, it was decided to erect a new house on the farm by voluntary labor. A committee was appointed to take charge of the work. The lumber and material will be supplied by the Soldiers Settlement Board from the fire insurance.

The funeral of Reuben Mosley, who was killed by lightning, was held on Friday last at the Didsbury cemetery. Rev. T. E. Armstrong, of Olds, officiating. The deceased was 37 years of age and was born in Derbyshire England, and came to Didsbury as an Empire settler in 1927. He is survived by a widow and five children.

## Conservatives Win With Clear Majority

Speakman Again Returned  
In Red Deer Riding

There was no question as to the choice of the Canadian people on Monday, when the Conservative party were swept into power with a clear majority of twenty-five over all other parties.

The most notable feature of the election was the breaking of the Quebec block, when twenty-four Conservatives were elected in that province. A big turn-over was also seen in the maritime provinces.

Two ministers of the late government went to defeat. Hon. Chas. Dunning, minister of finances, in Regina and Hon. T. A. Crerar, minister of railways, at Brandon.

In the Red Deer riding, Alfred Speakman, U.F.A., was returned over W. J. Botterill, Conservative, by a majority of 1575.

Voting was not nearly so large as in the provincial election and at the three town polls, Speakman received a majority of 55.

The results of the polling in the District were as follows:

	Speakman	Botterill
Jutland	49	43
Neapolis	44	15
Didsbury East	103	52
Didsbury West	135	131
Dog Pound	59	21
Elkton	37	24

## Young People's Rally At Didsbury

The Lutheran Church enjoyed a pleasant and most successful rally at the Butte last Sunday afternoon.

After service in the local Lutheran Church in the morning, the gathering repaired to the Butte where a picnic-dinner as well as a picnic-supper were enjoyed. The afternoon was spent playing wholesome games and the rally came to a close in the evening with a short meeting in which Rev. C. Thies of Calgary gave an address on hospice work.

In the two offerings taken up during the day, the young people contributed \$7.00 for poor students and \$10.00 for hospice work. The attendance was estimated at 75 young people.

## A World Subject of Discussion

The whole civilized world is discussing one subject today.—Tariffs. And in those countries which are the more highly organized, where the standard of living is highest, where the most modern and efficient methods of production, both in agriculture and in industry, prevail, the discussion is most keen.

For over a year and a half the United States has been in the throes of a nation-wide struggle over the new Hawley-Smoot tariff, the effect of which is to raise duties against all other countries to a height never before attained.

In Great Britain, Lord Beaverbrook, supported by his fellow publisher, Lord Rothermere, is engaged in a great campaign of publicity with the object of swinging the British people into support of a new fiscal system, based on the idea of free trade within the Empire, or as near an approach to it as possible, coupled with tariffs against all foreign countries. Ex-Premier Baldwin still maintains his stand in favor of what are termed "safeguarding" of industry duties, coupled with a referendum on the question of placing a tax on food supplies in order that a preference may be given to the overseas Dominions.

In France, in Germany, in Italy, and in other European countries feelings akin to bitterness have developed against the United States because of the higher duties that country has levied against the world. All these nations, heavy debtors to the United States, feel outraged that the only means whereby they can pay their war debts to the U.S., namely, by exports to that country, is thus largely closed to them. Talk of reprisals is general, and in a number of instances higher tariffs have been imposed, particularly on products and manufactured goods in which the United States is a large exporter.

The Commonwealth of Australia, finding itself over-burdened with an extremely heavy national debt, and in need of larger revenues, has raised its tariff to new heights, and in regard to certain articles has entirely prohibited their importation.

In Canada, the recent Budget of Hon. C. A. Dunning, imposing countervailing duties on a specified list of articles against the United States, raising other duties as against that country, and increasing the scope of the preference accorded to Great Britain and other parts of the Empire, is now a daily household topic all over the Dominion, and the outstanding issue in the general election campaign now in progress.

Without presuming to offer any opinion on the relative merits of High Tariffs, Low Tariffs, or no Tariffs at all, because to do so would be to enter into the realm of partizan discussion, and such discussion is rigidly barred in this column, the question may well be asked: What is to be the outcome of this world tendency on the part of practically all nations to erect trade barriers one against the other, and each one against all others?

Certain facts must be recognized and admitted by all. It cannot be denied that Tariffs do engender hard feelings and suspicions between nations, and when such feelings develop, no matter what the cause, there is always great danger of the ensuing bitterness becoming gradually more intense, and the opposing peoples brought to a frame of mind where they are less ready to co-operate in other matters for the common good of all. In a word, international goodwill is placed in jeopardy, and a situation created where some little spark might easily start a mighty conflagration,—another World War in fact.

But even should such a dire calamity not result, what is going to be the economic effect on the world, and on each separate nation, if one and all pursue the policy of erecting trade barriers each against the others? The logical end, of course, would be the complete cessation of all international trade. With each nation refusing to buy from other nations, or at least making it as difficult as possible to do so, it would inevitably follow that no nation could sell to any other nation, or to a very limited extent. This is a situation that must be faced, because it is looming up on the horizon in view of the economic and fiscal policies now under such wide discussion.

If nations decide not to buy largely, or at all from other nations, it follows, we repeat, that there will be no buying nations to which other nations can sell. Will this redound to the advantage of any nation? Take the United States as an example. If it refuses to buy from others, and those others in return refuse to buy from it, will the United States be better off? Can its own people consume the enormous output of its factories and fields? The answer, of course, is "No." Then the inevitable result is less production, which in turn means less employment, and decreased employment means decreased buying power, and that means a still further decrease in consumption, production, employment, buying power.

It means further that if other nations will not buy goods made in the United States, the manufacturers in that country will erect branch factories in foreign lands, and employ the people of those countries. Thus these foreign people will secure employment at the expense of the United States worker.

And if other countries follow the same policy and do likewise, how much better off will any one of them be than if they continued to raise those crops for which by nature they are best fitted to produce, or manufacture largely for world trade, and each distribute freely one to the other?

The need of the hour in all lands would appear to be sound thinking and sane consideration of basic economic principles, divorced from purely nationalistic desires and ambitions.

### Keep Outdoors In Summer

Get the outdoor habit this summer. It improves both the health and the temper. Clothes can be mended on the porch, peas can be shelled and potatoes peeled out in the open air quite as efficiently as inside. You can even take your lunch tray outside with a few extra steps and eat de luxe in the great outdoors.

### Red Clover Seed Record

The production of red clover seed in Canada, in 1929, was the largest in the past quarter of a century. One of the most important legume crops, red clover for successful growing depends on hardy acclimatized seed. Special attention is being paid by the Seed-Branch of the Dominion Department of Agriculture to the growing of registered red clover seed.

Not only has King George of England worn the same crown for 20 years, but it seems he hasn't had it relocked or the band changed.

The word "budget" is an old English word meaning a leather wallet or purse.

### Farm Loans Act

Six Canadian Provinces Have Taken Advantage Of the Act

Six of the provinces of Canada — Nova Scotia, New Brunswick, Quebec, Manitoba, Alberta and British Columbia—have taken advantage of the Farm Loan Act of Canada, securing long term mortgage credit. At the end of March loans to the amount of \$4,351,000 had been approved. Each borrower becomes a shareholder in company with the Canadian and Provincial Governments and receives his share of the profits. Loans are made on first mortgages on farm lands and farm buildings.

## A REAL NERVE TONIC

Is a Bountiful Supply Of Rich Health-Giving Blood

Sufferers from nervous debility find themselves tired, low-spirited and unable to keep their minds on anything. They are totally unfit to perform their everyday duties.

Doctoring the nerves with sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich, red blood. To secure this rich, red blood Dr. Williams' Pink Pills should be taken. Enriching and purifying the blood is their whole mission. Concerning them Mrs. Albert Bentley, Bancroft, Ont., writes: "Two years ago I was a complete wreck; in bed for seven months; extremely nervous had no color. Nothing I tried seemed to help me till I began Dr. Williams' Pink Pills. My condition at once improved and today I am well and able for anything without fatigue or trouble."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Saskatchewan Appointment

P. C. Ward Now Chief Clerk Of Natural Resources Department

Official announcement was made recently of the appointment of P. C. Ward, Regina, as chief clerk in the Provincial Department of Natural Resources. Mr. Ward is also a member of the public service commission, and in the absence of P. H. Shelton, is acting chairman of that body. Previous to the appointment of the commission, Mr. Ward was civil service commissioner for a number of years.

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily evacuated with other refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

### Saskatchewan Pool Elevators

Handled 87 Per Cent. Of All Pool Grains Delivered In Province

During the present crop year Saskatchewan Pool Elevators Limited have handled 87.2 per cent. of all pool grain delivered in the province, according to an official report. This is the highest percentage that the organization has handled in any crop year to date.

The Terror Of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It seems beyond the power of human aid to relieve until one trial is made of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and, if the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

### Canada Sound Financially

Canada was described as the most sanely optimistic country he had ever been in by Sir William Letts, British automobile executive in an interview given at Toronto. He had visited the United States and the countries of Europe and had found Canada in what he believed to be healthier financial condition than any of the others.

## Her Two Children Had Summer Complaint

Mrs. J. J. MacDonald, Glace Bay, N.S., writes:—"I am the mother of six children, and would not be without a bottle of Dr. Fowler's Extract of Wild Strawberry in the house. My two youngest were very sick with summer complaint, and there was nothing I tried could equal that remedy, and I had tried most everything, but they could get no relief. 'Dr. Fowler's' made a change in both of them in less than two hours."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

### Recipes For This Week

(By Betty Barclay)

#### SUMMER SALAD COMBINATIONS

Here are a couple of simple recipes for summer salads, that should come in handy at this time. Liberal servings of such salads will enable you to eat less of the heavy foods, and thus put yourself in better position to stand the heat of summer.

Cherry Delight: Arrange three or four large orange sections around edge of a lettuce cup made by cutting a small head of lettuce in two and scooping center from one half. Fill centre of cup with stoned cherries. Serve with mayonnaise or boiled dressing.

Orange and Strawberry: For each serving use one slice pineapple, quartered; and three or four orange slices, halved. Garnish with four large, ripe, unhulled strawberries. Top with a marshmallow half.

#### A DELICACY WITH FRESH BERRIES

- 1 package vanilla junket.
- 1 pint milk.
- Strawberries.
- Powdered sugar.

Make junket according to directions on package. When ready to serve, dust berries with powdered sugar and fill up the glasses.

Fruits like oranges, pineapple and strawberries should not be put into the milk when making junket, as the fruit causes it to whey. Crushed and sweetened, these fruits make tasty toppings.

Blackberries or raspberries may be put into the desert, also canned or preserved berries, peaches or other fruits.

#### Minard's Liniment gives quick relief.

##### Rivals Boy's Pocket

Handbags carried by women are beginning to rival the small boy's pocket for variety of contents. One bag examined recently contained a handkerchief, bundle of letters, diary, mirror, comb, purse, note-case, stocking-mending outfit, cigarette case, lighter, powder-case, lipstick, keys, patterns of cloth and a shoe-lace.

### Ceremonies Were Simple

Memorable Fete In Iceland Opened By King Christian

Christian, King of Iceland, on June 28, opened the 1930 session of the Icelandic Parliament, halting at the very spot where one thousand years ago this oldest parliament in the world first was convened.

King Christian stood upon a huge rock in the middle of the plain of Thingvall, where Grim Goat-beard, the law-giver, in ancient days, recited from memory the entire code of Icelandic law.

The ceremonies were simple as of old, so simple as to obtain an almost religious aspect.

The broad plain, bounded on the south by a great lake, on the north by rugged snow-capped mountains, on the east and west by two great fissures of volcanic formation cut before the dawn of history, was dotted with many thousands of people who had come from far corners of the earth.

### Newest Novelty In Paris

Tea Tables Are Now Covered With Map-Cloths

The French need no longer be identified as a race which doesn't know its geography. The newest novelties are map-cloths to cover the tea table. On them are maps embroidered in colors. You can sip tea over Ireland and the Isle of Man, or over the old Barbary States, with all the rivers and mountains named. These novel tea-cloths are in parchment shade which makes them look like leaves out of a real atlas.

Keep your stock free from blemish with Douglas' Egyptian Liniment. Removes inflammation, quickly relieves bruises, sprains, strains, swellings, contraction of cords, stiffness of joints, and sore muscles.

"I have nothing but praise for the sermon," said the Scotchman. And he proved it.

For Blisters and Boils—Minard's Liniment.

Mexico's metal production is increasing.

**Cut Down Food Wastage**

--- by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

**Appleford Paper Products**  
HAMILTON ONT.

Western Representatives:  
**HUNTER-MARTIN & CO., REGINA, SASK.**

## The Bacon Export Market Neglected As Canadian Hog Industry Fails To Expand

Exports of bacon from Canada to Great Britain are no greater today than they were 37 years ago. This means that while our hog industry has not ceased to grow, the growth in the number of hogs produced annually has not been enough to take care of the needs of both export and domestic markets.

The chart on this page will help to make the conditions clear at a glance. The upper line shows the rise and fall of our bacon exports to the British market since 1893. It tells its own story of a rapid rise until 1900, a slight recession then and a rise again to 1904, with then a steady drop until in 1914 we were almost back at the 1893 level, which may be taken as the end of the first period. Then followed the enormous wartime increment until 1921, followed by a rapid downward trend until today we are again back at the same level as 1893.

for the two periods. The per capita consumption in Canada, so far as the available records go, seems to have increased. An estimate of the Bureau of Statistics set the pre-war average at 60 pounds per person. In 1928 the per capita consumption of all pork was estimated to be 82 pounds — a figure arrived at by dividing the total production less net exports by the total permanent population. This does not seem to take into account the highly important temporary population of the now vast tourist trade in Canada. If this were properly given weight the per capita figure reported might be considerably diminished. Yet whatever increase has taken place in consumption over the period as a whole it is evident that provision has only been made for one of the two Canadian markets. The vast export possibilities in Great Britain have not been neglected in the full

### An Empire Service

#### Duke Of Connaught Advises British Youths To Go To Canada

"There have probably been no greater openings at any time in the world for young men prepared to work than those presented by Canada today," declared the Duke of Connaught, formerly governor-general of Canada, in his address at Wellington College, Crowthorne, recently. There was an enormous demand for qualified engineers and chemists and if Britain were able to keep up sending a steady stream of trained men to the dominions it would be doing a great Empire service.

### Busy New York

In New York City, a child is born every four minutes. Nine million persons scramble daily for subway seats. Fourteen persons are married every hour. On the average for a year, 23 new buildings are put up every day and six torn down. New Yorkers and their guests eat 7,000,000 eggs a day. And how the human family loves amusement! There are 800 theatres in New York City.

## Extraction Of Gasoline From Tar Sands Of Alberta Is Now An Accomplished Fact

### Planning Sheep Survey

#### Dominion Government Will Make Complete Study Of Western Conditions

An economic survey of sheep ranching in Saskatchewan, Alberta, and British Columbia will be undertaken this summer by the Dominion Department of Agriculture. Dr. J. Grisdale, Deputy Minister of Agriculture, has announced. The work will be under the direction of the agricultural economics branch in co-operation with the Dominion experimental farms. Preliminary arrangements for the survey are practically completed and field work will get under way in the near future.

A complete study of conditions in the sheep ranching industry is contemplated. This is the beginning of a programme of research work in agricultural economics on behalf of the livestock industry.

It is anticipated that between 150 and 200 sheep ranches will be visited in the three provinces, and at these complete information with respect to all phases of operation will be sought. The economic survey will seek to establish facts as to the profitability of sheep ranching as carried on in different regions.

### New Classification For Corn Exhibits

#### Five Groups Instead Of Four As Announced For Grain Show

The executive of the World's Grain Exhibition is recommending that conventions of other bodies to be held about the same dates in 1932, should arrange in advance so that there will be no conflict and as little congestion as possible.

L. H. Newman, Dominion cerealist, reported on a new classification for corn exhibits which recognizes five distinct groups instead of four as formerly as follows: Dent varieties requiring less than 110 days to mature, varieties requiring more than 110 days but less than 130 days to mature, and varieties requiring more than 130 days to mature; and Flint varieties requiring less than 110 days to mature. Total prize money remains unaltered, namely \$19,000 for all classes.

It is estimated that one out of every 34 automobiles in the United States has an accident at some time during the year.

A pedestrian is a man whose son is home from college.

### A Comparison of Canadian Bacon Exports and Pork Imports

We are back at that stage—but worse. For now our exports, about 20 million pounds in 1929, are almost exactly balanced by our imports from the United States. This is seen from the lower line showing our imports since 1906.

That balance means that Canadian hog growers are producing just enough for the home market with no margin whatever for an export trade. In general, it may be said that the American imports are not re-exported. They are absorbed into the domestic trade, filling a gap that would otherwise be left in the home supplies by the absorption of the Canadian selects and bacons used in our export Wiltshire trade. To a less degree we seem to have developed the same trend as in Ireland, where the better grades of bacon are shipped to England and American bacon is imported for the domestic table.

In 1893, the year in which the chart records begin, Canada had a population of about five million people. The number of hogs then reported on farms was 1,734,000. In 1929, when our population was about ten million, our hog numbers on farms were set down as 4,382,000. That is a ratio of about 34 hogs to every hundred people in 1893, and of 43 hogs today. Forty years ago hogs were heavier than they are today, but the litter is probably larger today and marketing is done much earlier, that is, the turnover of livestock is faster, so that the total amount of pork produced may not be greatly different

sense of the term, but no strong co-ordinated effort by producers has been made to turn it to proper account. Canadian packers have striven unrelentingly for well over a quarter of a century to hold that market, first against the competition of Irish and Danish bacon shippers and, latterly, against Dutch, Swedish, Baltic and Polish competitors. But without hogs no bacon trade can be kept going. And the number of hogs kept on Canadian farms have been insufficient to supply more than one market.

The British market in bacon is most vital to the Canadian hog producer both with regard to actual size and in its trend. For the last three years the British importations have been: 1927, 948,528,000 pounds; 1928, 990,000,000 pounds; 1929, 927,584,000 pounds. Canada supplied in 1927, 56,336,000 pounds, or 6 per cent.; 1928, 34,384,000 pounds, or 3½ per cent.; and 1929, 22,288,000 pounds, or 2½ per cent. of the total. This year it is expected that our supply will drop below 2 per cent., of not be almost wiped out.

So much for the size; what of the trend? Take only after-war conditions. In 1921 the total British imports of bacon were 636 million pounds. They went up by leaps and bounds each year until in 1928 they were but a little short of a billion pounds—an increase in the eight years of over 55 per cent. In that period the Canadian share of the total trade had slipped back from 14 per cent to 2½ per cent.

It is noteworthy that though there have been increases in the lower priced qualities of bacon from Russia, Poland, and the Baltic, with frozen pork from New Zealand and Argentina, the main increase in the British trade has been in the higher-priced qualities of Wiltshires from Denmark, Sweden and Holland, the first two running a little above Canadian and the Dutch a little below.

Looked at from the national income point of view the loss to Canada of this great trade is important. The British consuming public has year by year paid out, in wholesale prices, enormous sums for imported bacon, of which Canada's share is far below the possibilities of production.

The Indian Government has curtailed orders for government railways.

### Street Accidents In London

#### Records Show Three Persons Killed and 127 Injured Daily For First Three Months

Official papers show that on each day for the first quarter of this year three persons were killed and 127 injured—in London, England, alone. Last year's totals of killed and injured in London, were 1,383 and 56,321. For the whole of Great Britain there were 6,696 killed and 190,817 injured. During the two and a half years of the South African war the total British loss in killed was 5,774. In the same period, on the figures given above, Great Britain may expect to lose 16,740 lives in street accidents.

## Prince and President

This photograph, sent by radio from Clydebank to this continent, shows His Royal Highness the Prince of Wales, accompanied by E. W. Beatty, chairman and president of the Canadian Pacific Railway, inspecting the mighty "Empress of Britain," ace of Canadian liners, just before she was launched. This 42,000-ton vessel, largest steamship in intra-Europe trade will be placed in service between Quebec, Cherbourg and Southampton in the early summer of 1931.

By the utilization of natural gas, gasoline in almost unlimited quantities can be commercially produced from the tar sands in Northern Alberta. Announcement of this discovery was made by Dr. E. H. Boomer, University of Alberta, addressing the National Research Council.

The credit for a new method, which yields light oils suitable for the production of gasoline, goes to Dr. Boomer and Dr. A. K. Clark, also of the university. A semi-commercial plant is now in operation in the field, and results show that Western Canada, at least, shortly will be independent in the production of motor fuel.

Research in connection with tar sands has been conducted for several years under grants by the National Research Council and energetic study has produced striking results, it was revealed.

By the application of hydrogen, obtained from the enormous quantities of natural gas available in Alberta, Dr. Boomer has hydrogenated the tar and produced a light oil that readily cracks to produce gasoline.

Dr. Clark and Dr. Boomer have been working for a considerable period on schemes to make tar sand and natural gas available for commercial consumption in transportation form. The first step in the process was to extract the tar from the tar sands, then by the introduction of natural gas into the combination a method has been found to produce a light oil from which gasoline can readily be manufactured.

Tar sands in northern Alberta were stated to be almost inexhaustible, while natural gas, with its important content of hydrogen, is also present in enormous quantities in the province.

The fact that a plant for the production of gasoline has already been set up and has established definite commercial possibilities, is regarded here as a favorite indication that gasoline from products that formerly went to waste is now beyond mere possibility, and promises the founding of an important industry.

Officials of the Natural Research Council are enthusiastic as to the possibilities of the new method as far as Western Canada is concerned, and are agreed that with large plants and large production, gasoline from this source would eventually become a competitive factor on the markets of Eastern Canada.

Dr. H. M. Tory, president of the National Research Council, expressed his approval of the discovery made by Dr. Boomer and Dr. Clark. Dr. Tory said that the new method of providing gasoline from tar sands held great promise and pronounced it "the most significant development in this direction in several years."

Considering the fact that semi-commercial production was already a fact, Dr. Tory said it might be expected that pronounced development would occur in a short time. Dr. Tory was not prepared to say to what extent gasoline produced by this means would invade Eastern Canada, but stated that such was not beyond the bounds of early possibility.

Experiments in an endeavor to utilize valuable materials in the tar sands and natural gas of the prairie provinces had been under way for some time, he said, but this was the most significant advance. The discovery had the value of rendering useful two of the most easily obtained products in that province through their combination.

Client: "I hear you paint splendid battle pictures?"  
Artist: "Yes."  
Client: "I want a group; my wife, my mother-in-law, my two sisters-in-law and myself."—Gutierrez, Madrid.

"Mummy, what is that?"  
"A picture-crow."  
"That is the first time I have seen one undressed."—Wahre Jakob, Berlin.

**"BLUE RUIN"**

Something should be done to the political Jeremiahs of Canada. This country is one of the most favored countries in the world. It has enjoyed a period of prosperity during the past five or six years such as it never experienced before and such as few other people have known. Leading bankers, industrialists, as well as railway presidents, have publicly testified to this fact, an indisputable fact. Yet from scores of platforms at this time there arise wails of the most pessimistic kind about the terrible economic state of Canada. Word pictures are painted by spell-binders that cannot but leave the impression on the minds of uninformed people that Canada is surely heading towards the scrap heap of nations and rapidly approaching bankruptcy and decline. If these things were true, which they are not, the part of patriotism would not be to proclaim the fact from the house-tops but to soberly face the situation and bring forth remedies for the condition that would not be predicated on turning one set of politicians out and putting another set of politicians in.

There is undoubtedly much business depression at this time. There is a good deal of unemployment. But this is also true of most countries. The New York Times, that most reliable newspaper, reported a few days ago the result of an official investigation of unemployment in New York City which showed around 300,000 unemployed workers in New York City. If that condition represents the United States generally, and it would appear to do so, then there must be nearly 5,000,000 people unemployed in the Republic. There are some authorities who declare the U.S. unemployment figures to greatly exceed that estimate. Great Britain has 2,000,000 persons out of work, with little hope of any improvement in that situation for some time to come. So that Canada is not only no worse off than two of her fellow Anglo-Saxon nations, but very much better off.

It would be more honest and infinitely more patriotic if the political preachers of "Blue Ruin" in Canada would recognize the facts of world depression rather than try to make political capital out of the economic situation of their country. The constant reiteration of their doleful lamentations about the state of Canada can have only one result. People will come to believe their pessimistic statements, and, once the mass mind is impregnated with such misleading propaganda to the extent of believing it, the condition these false prophets rail against may be brought into existence. Our people will lose faith

**LOCAL & GENERAL**

Miss Nohr, the marcelleure, wishes to announce that she has removed to the Leuzler Block above Hawkes' Store. Schoolgirls' marcel, 35c. and 50c. Ladies' marcel—50c. and 75c. Also finger-waving. 30 3p

Mr. Alec McNaughton attended the Alberta Rifle Shoot held at Calgary last week. While Mr. McNaughton was not successful in winning any of the big money, he was well up in the grand aggregate and earned a place in the Alberta Rifle Team to go to Ottawa but owing to pressure of business, Mr. McNaughton is unable to take in the trip

they will lose heart and the country may suffer so much that it will take years to recover our lost standing. It matters not what political colors fly from Parliament Hill, but it does matter that Canada shall not entrust her destinies to men who are ever ready to defame their country for the sake of political advantage and who picture their country before the world as in the last stages of decrepitude. As the whole world well knows, this Canada of ours is amongst the most prosperous of all countries, both actually and potentially, and offers bigger and better opportunities than virtually any country in the world. Let there be an end to this foolery.

**Breaking New Trails in the Rockies**

Every year the Order of the Trail Riders of the Canadian Rockies gathers together its devotees who set out into the unknown, or the almost unknown, on mountain ponies from the starting point at the Banff Springs Hotel or Chateau Lake Louise. For those new to the game there is a trail ride of a few days, covering, however, little travelled paths, while for the expert there is a ride of three weeks penetrating to the heart of the Rockies, and both end in a Grand Pow-wow or campfire meeting where songs are sung and the feeling of general jollity is perpetuated. These Trail rides are held in August when the weather is at its best and lovers of the outdoors gain an experience which, even if they never repeat it, will furnish them with memories and stories for a life-time. Every year new trails are broken, the one last year being over Gibbon Pass, named after the founder of the Order. The rides attract travellers from every part of the continent

and from Europe, and some 1,500 of them are now enrolled in the Order. Lay-out shows riders passing through Gibbon Pass, taking a rest at Shadow Lake with Mount Ball in the background, and fording an arm of the Lake of Hanging Glaciers.

## AIR MAIL SERVICE

### FOR FAR NORTH

During the season of navigation, parcel points to posts in the Mackenzie River District may be accepted at the same rate of postage as prevailed prior to the inauguration of the air mail service in that district, according to advice from the deputy postmaster general's department.

In addition to this service there will also be the air parcel post service at the higher air parcel post rates. The boat service will not be as frequent as the air mail service and parcel post forwarded via this route will necessarily take much longer to reach destination than parcel post prepaid at the higher air parcel post rates.

The choice of the route for parcels to points in this district during the season of navigation will rest with the sender. Persons wishing to forward parcels by the air mail service should prepay them at air parcel post rates and endorse them "via air mail."

## PENSIONS CHANGE

There has been a provision in the Pensions Act of Canada that if a veteran accepted a lump sum in lieu of pension, this decision must be regarded as ending the matter unless he can prove his disability has become greater in extent. The Government has now altered this clause so that if the veteran's pensionable disability has persisted, even if it has not increased, he may be restored to pension payments, if continued, would have amounted to the sum which was paid him.

That is, the "commuted" pension payment accepted by any veteran is now to be regarded as installments of pension paid in advance, and not as a discharge of the nation's entire obligation towards him. It is surely a wise and just provision.—Toronto Star.

## ANOTHER SOLUTION

Perhaps the only means to alleviate such distressing conditions of unemployment as have been revealed this spring throughout Canada, is a great scheme which would care for the unemployment from coast to coast. Then what better work could be done than that of a trans-Canada highway?

We remember how swiftly Canada sprang to arms when the Great War broke out. She has the resources and the genius for administration if the need is great.

There is no doubt that the need is great. Immediately elections are over provinces and dominion should hold a conference to determine practical action.

A great deal of work could be provided this year to help take care of the men during the winter. And even during the winter work could be provided in certain districts.

## EMBLEM OF ROSE

The choice of the wild rose as Alberta's emblem was arrived at in the first place by a general province-wide vote taken by a leading women's organization in Alberta. The rose proved to be pre-eminently the popular choice as emblematic of the province. This conclusion was then presented to the Legislature, consideration was given the matter, and on Dominion Day, 1930, the wild rose has become officially Alberta's emblem.

It is doubtful if any one will dispute the suitability of this choice. There is not a part of Alberta where the wild rose is not found. It grows in foothill and on prairie, in north and south. It is rugged, staunch and enduring. In flower it is beautiful and fragrant. All in all the choice is most appropriate.

### BUTTER SUPPLY UP TEN MILLION POUNDS

An increase in the number of pounds of butter in cold storage in Canada on July 1st, over the figure for the previous year and the de-

creases in the storage totals of both eggs and cheese, were noticeable in a report issued by the Dominion Bureau of Statistics.

The number of pounds of butter in storage on July 1st was 21,961,220, compared to 11,237,900 on July 1st,

1929, and 12,672,966 representing the average for the past five-year period. The number of pounds of cheese this year was 15,730,096, compared with 17,976,400 on July 1st, 1929, and 18,879,940 as the five-year average. There were 14,595,759 dozen eggs

Almost Obsolete . .

the ice pick

And now, instead of hacking away awkwardly while splinters of ice fly here and there, you simply lift out the tray full of frozen cubes. They're just the right size, easily handled, always ready.

Now, too, you can have your frozen desserts ready in the short space of time it takes to prepare dinner, put them in the freezing compartment of the Electric Refrigerator when you start and at dinner-time they are perfectly frozen.

Convenient? of course. But more than that, a health essential. For medical authorities now say perishable food is safe from spoilage only when kept in a temperature of below 50 degrees. The dry cold of the Electric Refrigerator remains below 50 degrees the year round.

From every standpoint, the Electric Refrigerator is an essential convenience to the modern housewife.

A wide range of modern electrical appliances may now be purchased direct from the Calgary Power Company on a small down-payment balance to be paid with your regular monthly light bills.

## WORLD HAPPENINGS BRIEFLY TOLD

Three hundred and fifty Canadian pilgrims headed by Cardinal Rouleau of Quebec, were received in audience recently by Pope Pius.

A permit to develop an area of 5-120 acres of bituminous sands in Alberta has been granted to Walter P. Hinton, Toronto, according to the current issues of the Canada Gazette.

The recently signed parcel post agreement between Cuba and Canada is expected to be a precursor to a complete commercial treaty between the two nations.

The French military tribunal has been dissolved and the possession of buildings, including the military prison, handed over to the German authorities.

J. G. A. Creighton, C.M.G., K.C., law clerk of the Senate, dropped dead in the Rideau Club, Ottawa. He was 80. He had occupied his post 48 years, and had also been parliamentary counsel of the Senate since 1909.

On June 27, the King and Queen of Iceland and Denmark, assisted by the Icelandic cabinet, received Canadians and Americans of Icelandic descent, at the foot of the famous Rock of Laws, in Thingvallir Plain.

Two hundred members of the Sons of Freedom, Doukhobor sect, passed peacefully through Nelson, on their way from Porto Rico, B.C., their home for the past year, to join the main Doukhobor settlement at Brilliant.

Announcement has been made that the Canadian Holstein Friesian Association will this year pay out \$15,000 in prize money to breeder-exhibitors of Holstein cattle in addition to the amounts paid out by fair boards throughout the Dominion.

The third No. 4 Canadian General Hospital Scholarship of \$250 in the faculty of medicine at the University of Toronto, has been awarded to D. W. Johnston, Regina, Sask. It is a war memorial scholarship given by the Alumni Federation of the University.

### Bred In Western Canada

A great majority of the people have the mistaken idea that the wild duck supply comes from remote northern fastnesses. Most of the ducks ordinarily hunted for game, except the black duck and perhaps the green-winged teal, to a certain extent, are western in their breeding range. The canvas-backs, red-heads, mallards and scaups, which are shot in Ontario and Quebec in the open season, are bred in Western Canada.

In Hollywood

"Do you see that gentleman? He's the nicest man I was ever married to."—Lustige Saches, Leipzig.

W. N. U. 1845

## Beauty and Usefulness

No Reason Why Everyday Things Should Not Be Attractive

The consumer has cause to rejoice over the reunion of beauty with usefulness. Where else if not in the home should such a movement exert its most beneficial influence? There is no reason why beauty, like charity, should not begin at home; why the lamp in the boudoir, the gas range in the kitchen, the ash tray in the library, the automobile in the garage should not be designed and colored by the best artists industry can afford to employ.

This flight into the realm of art which modern business has taken is more than a profitable sales appeal. It is a cultural force that, if not dissipated in a straining toward extremes, may eventually help to raise the level of popular taste.

## Canadian Bond Sales

Amount Being Invested In Bonds Speaks Well For Prosperity Of Dominion

The first five months of the present calendar year saw Canadian bond sales total \$292,677,277, as compared with \$228,765,612 for the similar period of 1929, and \$210,285,660 for that of 1928. Two thirds of the whole, or \$214,899,277, were purchased in Canada, while the remainder, amounting to \$77,778,999 were bought in the United States.

(By Annebelle Worthington.)

The feminine influence is apparent in a printed crepe silk with flared cap sleeves and bow neckline. It is the smart moulded silhouette with belted natural waistline. The back is slim and straight.

Circular flared front of skirt provides interesting fulness. Style No. 3473 comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust. It's an excellent model for the attractive summer cottons, as printed dimity, pique prints, embroidered batiste and printed voile.

Flat silk crepe in skylark blue, dusty-pink shantung, coral-red linen and candy striped silk shirting are attractive selections.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

### Using Small Seadrome

San Francisco Air Ferry Has Float Anchored At End Of Dock

A seadrome, built on the principles of proposed mid-sea landing places for aeroplanes, has been put in service by a San Francisco bay air ferry service. It is 100 feet wide, and declared to be the smallest floating island landing place in the country.

Shaped like an inverted saucer, the landing contrivance has a smooth rounded top and beneath its hull is a system of air tanks which may be regulated to control the depth and angle at which the device floats. The artificial island idea is carried out with sand on the inclines to prevent the amphibians from skidding. The sand is cemented into paint. The float is anchored at the end of a dock where more than 85 landings a day are made, with a similar number of take-offs.

### Build Annex To Elevator

Big Grain Storage Elevator At Fort William To Be Enlarged

Erection of a grain storage annex of 1,600,000 bushels capacity to the Fort William terminal elevator of N. M. Paterson and Company, is announced by Norman M. Paterson, president, at a cost of approximately \$250,000. Construction will start immediately by the Fegles Construction Company, of Minneapolis and Fort William. It will be completed and ready for storage by about October 1. Engineers of the Fegles Company will prepare for construction to begin within a fortnight.

### To Prove His Belief

A Polar expedition may be launched by Dr. Knud Rasmussen, noted Arctic explorer, to demonstrate his belief that the Eskimos are related to the neolithic men who inhabited the caves of what is now France and other parts of Europe.

## Serum Saves Children

Serum Treatment For Infantile Paralysis Used Successfully

Such tremendous strides have been made in curing infantile paralysis that not one victim in the province of Ontario last year who received serum on the first day of illness, was paralyzed. Neither was there a death among them. These facts are contained in a pamphlet published by the Federal Department of National Health under the supervision of Dr. Helen Macmurchy, chief of the division of child welfare.

Because of the large number of cases of this disease in Canada last year, and particularly in Ontario, the department published the booklet which gives, in clear and understandable language, directions to mothers for taking care of stricken children. Last year there were 834 cases in Canada, of which 558 were in Ontario, and 90 in Quebec. No province was free from cases. There were 70 deaths.

### An Expensive "Toy"

Perfect Model Of London's Underground Shows Safety Of System

Perhaps the most expensive "toy" in the world, and one which has certainly filled the hearts of boys of all ages with envy, was put on show at a London underground station, recently. This was a complete model section of the Underground system, consisting of a miniature track, with three beautifully-made model trains. The idea of the model is to show those who travel by Underground how the safety system works. As the trains run, they switch on the red signal lights behind them. Then, as they pass from one section to the next, the lights turn to green. So the model shows quite clearly that there can never be two trains on any one section at the same time.

### Regina's Population Increases

Population Is Now Estimated To Be Nearly 67,000

Population of greater Regina is now 66,996 according to figures released by the Regina Board of Trade. The figures represent the population of the city on June 1, it was said.

This figure shows a growth of 4,515 over the previous unofficial figure of 62,481 compiled by Henderson's directories and the Regina Board of Trade, reported for June 1, 1929.

The front pew in the church may lack the required degree of upholstery, but at least there's no wind-chill to take a header through unexpectedly.

**PILES**

RAIN STOPS LIKE A FLASH!

Months. Nothing helped. Then "Piles" was used. Piles were cured in 1 minute. Piles were gone. P. E. C. Arley, instant relief. Piles vanish. Avoids knife. All druggists.

## High In Mental Ability

George Bernard Shaw Brainiest Man In England According To Vote Taken

George Bernard Shaw, according to readers of The Spectator, the well-known London weekly review, possesses the best brains in the country. The Spectator is a journal circulating among the more thoughtful class of people whose opinions in regard to mental ability are worth considering.

The result of the recent vote is interesting in many ways. Here are the leading men in their "order of merit": Bernard Shaw, 214; Sir Oliver Lodge, 183; Lord Birkenhead, 162; Winston Churchill, 95; Dean Inge, 91; H. G. Wells, 86; Lord Melchett, 62; Lloyd George, 50; Phillip Snowden, 48; Sir John Simon, 45.

The present prime minister does not receive a vote and Mr. Baldwin gets but 13. The Archbishop of Canterbury, Dr. Lang, finds no place but the Archbishop of York (Dr. Temple), with 32 votes follows closely upon the heels of Lord Reading, who obtained 35. Sir James Barrie is "placed" by 15 voters and follows G. K. Chesterton's 17.

## Good Roads Program

Extensive Mileage In The National Parks Being Built This Year

Good roads are being extended to every part of Canada. In the rural districts of every province there is a network of paved or surfaced roads, which not only are of benefit to the motorists, but to the farmers. In the National Parks of Canada, the great playgrounds of the country, maintained by the Canadian Government, there is an extensive mileage of improved roads. The road building programme in these parks this year is a substantial one and the provincial governments are constructing sections to connect the roads in the parks with the principal provincial highways.

### Good Even M Old

Students of Ottawa University have been served plum jam which had been buried in the scholastic grounds for twenty-seven years, and they liked it. Forty quarts of the preserves were found buried several feet in the earth by excoavators, working on the location of the old kitchen destroyed by fire in 1903.

# Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN  
YOUR LOSSES  
BY INSTALLING  
WINDOLITE

USE  
WINDOLITE  
IN  
BROODER  
HOUSES  
LAYING PENS  
DAIRY BARN  
SUNROOMS  
ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

### CHAPTER XIX.—Continued

Charman nodded, took the scrap of paper and stubby pencil he was holding, and wrote it down.  
"I never was much good at remembering addresses," declared the doctor. "Here it is, Annie. Run in quickly, or you'll take cold."  
The small girl who had followed him from the house, grasped the paper in her cold hands, and, with a shy smile for Charman, scurried away like a half-frightened animal.  
"They must be very poor," said Charman as the doctor took his place beside her. "What does that woman want with Jimmy's address?"  
She was thinking: Could it be possible that Jim was still collecting interest, at this distance? The thought hurt incredibly. For the sake of auld lang syne and her peace of mind, she wanted to think better of him than that. But how could she if . . .  
She turned to look at the old doctor. He seemed to have read her thoughts as he responded: "There is a verse in the Bible, Charman, that says: 'When thou doest alms, let not thy left hand know what thy right hand doeth.' That describes as well as anything could, I think, Jim Bennett's character. Seeing him going about the country on the bank's business 'the best man for the job' they've ever had, according to George K., one wouldn't suspect that he was wearing the mantle of the Good Samaritan, now would they?"  
"I—I don't seem to understand."  
The doctor smiled at her bewilderment.  
"Why should you? If I didn't follow pretty closely on Jim's heels, I wouldn't understand, myself. Like as not he'd pound the life out of me for telling; but that doesn't scare me—with the boy three thousand miles away! You see, my dear, Jim's father left considerable property. Jim came into his share at twenty-one, and he earns a good salary at the bank. He's well fixed—for Wickfield. No tie save his mother, and she's provided for."

The old man paused, while Charman urged impatiently: "Go on, please, Doctor. You're wandering all 'round Robin Hood's barn." You say that Jim is a good Samaritan; but if collecting interest from windows and orphans—

"Tut! tut!" broke in the doctor quickly. "You go too fast. I think you'll admit that there's a difference in collecting interest from the poor, my child, and paying that interest for them—lending a hand—helping a

lame dog over a stile, you know—loaning one's own money with no interest. That's what our Jim's been doing for five years whenever he came across a case deserving help. That woman wanted his address so she could send a Christmas card."

"Oh, no!" cried Charman.  
This was, the doctor understood, not a protest at the Christmas card, but at her own blindness. She had to set her firm white teeth into her lip in order to keep it steady. "I must have hurt him horribly," she confessed after a tense moment. "I was a fool! I didn't see. I asked if he felt like—like Shylock!"

There came a silence; then the doctor said: "Yes—that would have hurt."

"He should have told me," cried Charman, grasping at this straw in self-defense.  
"How could he—being Jim? You had misjudged him," responded the old man with rugged honesty.

"I shall never, never forgive myself!" she declared passionately.  
The doctor smiled.

"Perhaps not; but Jim will forgive you, child, if I know him as I think I do. There! Charman, don't be too much disturbed. Just drop the lad a line and say you understand."

"But will he understand?" asked the girl, raising unhappy eyes to her old friend. "I should think he'd despise me."

"Not Jim!" answered the doctor. "Come, child, cheer up. We're almost home, and I don't want Grandma to think that I've been scolding you."

Charman managed a misty smile as she replied: "I deserve worse than a scolding. I—I ought to be—lynched!" And they both laughed as they drew up before the window where Grandma was waiting.

"So you've had a ride?" she asked as the girl came in. "Were you warm enough? It's a terribly cold day. The doctor's run in three times from the office to look at the furnace. I wish I was young enough to marry that man, Charman, just to keep him in the family. Some one'll get him."

"Undoubtedly!"  
Charman smiled, but as she slipped off her coat and sought the register for warmth, her recent conversation on the subject of John Carter came back, and her color deepened.

"Yes, I was warm enough, Grandma, thanks to Doctor Howe's 'old faithful,' as Jim calls that ancient cape. We went to South Wickfield while he made a call."

"Who on?" asked Grandma with ready interest. "The real sick season's just beginning."

"The Smithsons. The mother has the grippe, but she's on the mend."

"Poor soul!" murmured Grandma compassionately. "She must have a real hard time making both ends meet. You ought to carry her something good to eat, childy, while she's laid up. I don't suppose there's any one to do for her but Edward Howe, though she won't have to worry about her doctor's bill! Sometimes I've wondered how she's managed to keep a roof over her head, left as she was with all those children."

"I'll tell you how," said Charman, and proceeded to divulge Jim's secret. Her voice trembled as she finished, not wishing to spare herself: "And I asked him, Grandma, if he didn't feel like Shylock! I remembered he answered, 'Why on earth should I?'—and that made me mad. Oh, I do think I'm the stupidest girl in the whole world! It does seem, when I've known Jim Bennett all my life, as if I might have understood that he wouldn't be hard-hearted to—to a sick kitten!"

She had sunk down on a hassock at Grandma's feet, and the old lady reached out and stroked her hair.

"There, dearie, Jim isn't one to bear a grudge. You just write him a real nice letter and say you're sorry. And that reminds me of something else. Jim was here one day when you were out. He wanted I should make you understand something after he got away, and the only times I've thought of it were when you were at school, or evenings when the doctor was in and I couldn't speak. It was about his mother and that apron-string business that's always bothered you. He said he'd tried to explain to you, but somehow he couldn't get it out, so he came to me. I guess maybe it's easier to talk to old folks. You see, dearie. . . ."

The girl looked up, breathless, as Grandma, finishing Jim's story, said: "It taught me a lesson; but if I forget myself, Charman, and ask any promises of you when my time comes, it'll be because I don't know what

I'm doing, and you mustn't feel called upon to keep 'em. James Bennett never meant for Jim to be a slave to his mother the way he has been. I told him so, and I think it made the boy feel happier. Anyhow, he said I did him a sight o' good. I've an idea that Jimmy's a lot more sensitive than folks give him credit for being."

"I—I don't see why he finds it so difficult to talk to me," said Charman, a vague hurt tugging at her heart.

"I do," replied Grandma. "It's for two reasons. One's because he felt you didn't understand him; and the other's because he cares such a heap more for you, dearie, than you've ever cared for him. I declare, Charman, so long as you don't seem to want the boy yourself, I hope he'll meet some real nice girl out in California, and marry her. He'll look different to a girl who hasn't seen him in short pants' days, wading barefoot in Fuller's brook, and his toes tied up afterwards in rags because he's stepped on a broken bottle or something—more romantic maybe."

A reluctant laugh escaped the girl as she arose.

"Well, Grandma, I feel like a criminal; but I suppose we've got to eat. Thank goodness it's bean night and everything's ready. You and John will have to play double Canfield this evening instead of bridge. I've got to write to Jim, or I shan't be able to sleep a wink. I feel," she added, turning as she reached the door, "I feel just about one inch high!"

### CHAPTER XX.

What ails our 'Blessed Damsel' these days?"

Grandma and the young doctor were eating their noon-day meal at the kitchen table. Christmas had come and gone, and Wickfield had settled down to the cold, hard, relentless winter months. For three weeks snow had fallen at frequent intervals, freezing almost as soon as it reached the ground, so that the roads and sidewalks were packed. Charman had expressed a wish that, despite the cold, they might stay that way till spring because the walk to school was so much easier on the hard snow than through the slush and mud that accompanied warmer days. She had refused the doctor's offer of a ride, and, feeling vaguely troubled, Grandma had watched her out of sight. Something was wrong.

John Carter's question, therefore, came as a relief, giving her an opportunity to speak her thoughts. Yet she smiled at his manner of putting it, though the young M.D. had addressed her granddaughter in a like manner many times since a day in August when he had driven into the yard to find her leaning from his own bedroom window, the sun making an aureole of her hair. He had stopped the car directly below her, and stared up in admiration as he said:

"You look like the blessed damozel."

### Picture of Health Now

"In May and June I was badly rundown and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George R. Gillespie, Punnichy, Saskatchewan.

**Lydia E. Pinkham's Vegetable Compound**

## For Young and Old Alike

ENO is so mild it can safely be given to any child, yet it is quite as effective for grown-ups, eliminating from the systems of young and old alike the clogging waste and poisons which cause intestinal absorption . . . unsuspected constipation . . . Refuse substitutes.

# ENO'S

## FRUIT SALT

"Her eyes were deeper than the depth  
Of waters stilled at even;  
She had three lilies in her hand,  
And the stars in her hair were seven."

"Did you do it purposely?"  
Charman, still leaning on the window sill, glanced down at the golden lilies in her hand, and answered: "Not guilty. As you perceive, I have had a shampoo. I went into the garden to let the sun lend a hand at the drying, and picked these posies for your bedside table. This accounts for my invasion of your domain; but your imagination is vivid, Doctor John. Where, please, are the seven stars to adorn my hair?"  
(To Be Continued.)

### Minard's Liniment for all Strains.

### Stands Every Test

### No Food Has Been Found To Take Place Of Milk

Milk is the food of all foods for mammals—of whom man is the chief. Further, it is the only food actually designed and evolved by nature to be food for them. It is, of course, merely lack of knowledge to regard milk as not a food because it flows as a liquid. In reality, it is solid in the breast and in the stomach; in nature it is only fluid for a second or two of convenient transit from one to the other.

Ordinarily we do not test our foods. Our diet is mixed, and we have a large factor of safety capital on which to draw during time of deficiency. There are four periods, however, during which food may really be tested; growth, athletic exercise, illness, and old age. And no other food can be suggested which remotely approaches milk when tested under these four conditions.

### Metallized Paper

M. U. Schoop, of Zurich, Switzerland, has announced that he has developed paper money which will not burn, tear or wear out. His process is described as spraying paper pulp with a protective coating of tin, aluminum or copper. The metallized bank notes are hard-surfaced but are said to be pliable and easily handled.

**Muscular Rheumatism Subdued.**—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

### A Rare Occurrence

February, 1866, was the most remarkable month in the history of the world. There was no full moon! That same year, January and March had two full moons each. This never happened before—and will not happen again for 2,500,000 years.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

A clock in an observatory at Sydney, Australia, is operated by sunlight.

One Paris hotel will run an airplane taxi service for its guests.

Minard's Liniment checks Colds at once.

### Little Helps For This Week

"As the body without the spirit is dead, so faith without works is dead also."—James ii. 26.

'Tis not the wide phylactery,  
Nor stubborn fast, nor stated prayers,  
That make us saints; we judge the tree  
By what it bears.

And when a man can live apart  
From works, on theologic trust,  
I know the blood about his heart  
Is dry as dust.

—Alice Cary.

The effective life and the receptive life are one. No sweep of the arm that does some work for God but harvests also some more of the truth of God, and sweeps it into the treasury of life.—Phillip Brooks.

**Persian Balm**—alluring, provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful to use. Creates complexions of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Persian Balm is a peerless toilet requisite for women who care for charm and distinction. Use it for hands and face.

Pure affection is a sentiment free from any taint of any kind, and is as rare as pure charity.

The first Chinese who studied medicine abroad received his medical degree in Edinburgh in 1854.

### TAKE NO CHANCES WITH BABY!

Cook Her Food in the "Health Ware"

Doctors recommend Enameled Ware for cooking baby's food. It is so simple to clean . . . so easy to keep sanitary and free from germs. It cannot stain. There is no metal surface exposed to the food. Nothing to absorb moisture, flavors nor odors.

Make sure you get McClary Enameled Ware . . . the Modern "Health Ware". Watch for the familiar McClary label.
